

**PEACE RIVER REGIONAL DISTRICT
DEVELOPMENT SERVICES
ZONING AMENDMENT REPORT
BYLAW No. 2321, 2018 (GARDINER)
1st & 2nd Reading**

OWNER:	Denise Gardiner	DATE: June 13, 2018
AGENT:	Tryon Land Surveying Ltd.	FILE NO. 17-272
AREA:	Electoral Area E	
LEGAL:	District Lot 553, PRD Except Plan 17999 and 21352	
LOT SIZE:	3.5 ha (8.7 ac)	
LOCATION:	Moberly Lake, north shore	

PROPOSAL:

To amend the zoning of the portion of the subject property lying south of Cove Lane from R-4 to R-2, and by further amending the allowable minimum parcel size on that portion of the subject property from 1.8 hectares to 0.84 hectares where there is no community sewage system.

RECOMMENDATION: [All Directors - Corporate Unweighted]

1. THAT Peace River Regional District Zoning Amendment Bylaw No. 2321, 2018 be read for a First and Second time.
2. THAT the holding of a Public Hearing be waived pursuant to s. 464(2) of the Local Government Act, and authorize public notification pursuant to s. 467 of the Local Government Act.

ALTERNATIVE OPTIONS

- OPTION 1:**
1. THAT Peace River Regional District Zoning Amendment Bylaw No. 2321, 2018 be read for a First and Second time.
 2. THAT a Public Hearing be held pursuant to the *Local Government Act*; and
 3. THAT holding of the Public Hearing be delegated to the Director of Electoral Area 'E'.
- OPTION 2:**
1. THAT the application be refused as submitted.

SITE CONTEXT

The subject property is located within the community of Moberly Lake. The general area is mostly small lot residential and recreational use, with a few lots developed for commercial use. The Moberly Lake First Nation reserve is located immediately west of the subject property.

SITE FEATURES

- LAND:** Based on aerial photograph interpretation The property is separated by Cove Lane. The lakefront portion has residential development and is mostly in riparian forest. The property north of Cove Lane is mostly cleared.
- STRUCTURES:** From aerial photography and what is stated within the application. Proposed lot 1 has a three sided hay and equipment shed, two horse shelters. Proposed lot 2 has a dwelling, and small garden shed.

ACCESS:	Property is accessed from Cove Lane.
CLI SOIL	Class 5 _{tp} .
RATING:	Class 5 soils have very severe limitations that restrict their capability to producing perennial forage crops, and improvement practices are feasible. The limitations are so severe that soils are not capable of use for sustained production of annual field crops. The soils are capable of producing native or tame species of perennial forage plants, and may be improved by use of farm machinery. The improvement practices may include clearing of bush, cultivation, seeding, fertilizing, or water control. Subclass t denotes topography. This subclass is made up of soils where topography is a limitation. Both the percent of slope and the pattern or frequency of slopes in different directions affect the cost of farming and the uniformity of growth and maturity of crops as well as the hazard of erosion. Subclass p denotes stoniness. These soils are sufficiently stony to hinder tillage, planting and harvesting operations.
FIRE:	Within the Moberly Lake Fire Protection Area
BUILDING INSPECTION AREA:	Within the Mandatory Building Permit area.

COMMENTS AND OBSERVATIONS

APPLICANT: The applicant is proposing to subdivide the property as divided by Cove Lane.

ALR: The subject property is outside the ALR.

OCP: West Peace Official Community Plan Bylaw No. 1086, 1997

The subject property is mostly designated 'Resource-Agricultural' within the West Peace OCP Bylaw No. 1086, 1997. The policies within this designation state that the predominant land use is for resource extraction on Crown lands or some sort of commercial agricultural pursuits on fee simple land.

Section 6.1.1 Development Policies:

With regards to any residential developments, the development of any roads, and/or public utilities, shall consume the least amount of agricultural land as possible.

As this is an existing developed residential parcel, this proposal meets the requirements of the OCP.

ZONING: Peace River Regional District Zoning Bylaw No. 1343, 2001

The subject property is zoned R-4 (Residential 4 Zone) pursuant to Zoning Bylaw No. 1343, 2001. This zone has a minimum parcel size of 1.8 ha (4.5 ac).

This proposal is not consistent with the current Zoning, and is the reason for this zoning amendment to R-2 (Residential 2 Zone).

Staff Comment:

The proposed zone does allow lots to have a minimum parcel size of 0.4 ha (1 acre) if it is connected to a COMMUNITY Sewage System.

WATER & SEWER: The proposed Lot '2' currently has a water well, septic mound, and dispersion field. There is no existing water or sewer system on the proposed Lot '1'.

IMPACT ANALYSIS

AGRICULTURE: The proposal should have minimal impacts to agriculture, as proposed Lot '1' could be further developed for residential use.

CONTEXT: This proposal is within the community of Moberly Lake. The general land use mostly consist of permanent and seasonal residential or recreational use. The applicant is requesting a lot size that is under the required minimum parcel size for the proposed R-2 (Residential 2 zone), however, it is recognized that there are similar sized lots directly adjacent to the subject property. The proposed zone also allows smaller lots if the parcel is connected to a COMMUNITY SEWAGE SYSTEM.

POPULATION & TRAFFIC The population could increase by an average of 4.8 people and 4 vehicles. This density is calculated by a population average of 2.4 people per dwelling in Electoral Area E (based on Stats Can 2016 census estimate) and 2 vehicles per dwelling. If the proposed zoning and subdivision are approved, the maximum number of dwellings permitted is two residences on proposed Lot '1' (proposed north lot). Proposed Lot '2' (proposed south lot) currently has the maximum number of dwellings permitted.

COMMENTS RECEIVED FROM MUNICIPALITIES AND PROVINCIAL AGENCIES

Referred Municipalities and Agencies:

Northern Health	MOTI	OGC	Chetwynd Fire Department
Saulteau First Nations	West Moberly First Nations	School District #59	Moberly Lake Fire Department
City of Dawson Creek	City of Fort St. John	Village of Pouce Coupe	District of Chetwynd
District of Hudson's Hope	School District #59	District of Taylor	District of Tumbler Ridge
Ministry of Forests, Lands, Natural Resource Operations & Rural Development			

The following were the responses received from the referred Municipalities and Agencies:

CITY OF DAWSON CREEK: Interests unaffected by bylaw.

CITY OF FORT. ST. JOHN: Interests unaffected by bylaw.

OIL & GAS COMMISSION Interests unaffected by bylaw. There are no oil and gas activities within 1.5 km of the subject property.

DISTRICT OF TAYLOR: Interests unaffected by bylaw.

**Peace River Regional District
Memorandum**

To: Dan Rose, Director of Electoral Area 'E'
From: Kole Casey, South Peace Land Use Planner
Date: June 15, 2018
RE: OCP & ZONING AMENDMENT REPORT BYLAW NO. 2321, 2018 (GARDINER)

Pursuant to the following resolution:

RD/15/04/26 (23)

That a two-week period be added to the development application review process to allow time for the appropriate Electoral Area Director to review applications prior to them going to the Regional Board for consideration.

The attached application and report are provided for your review.

Please return this form with your comments by or before June 29, 2018.

Please contact me if you have any questions.

Thank you.

To: Kole Casey
Subject: Gardiner Subdivision Proposal

Hi Kole,

Could you please amend our rezoning application so that the proposed zone is now R2 instead of R3.

Thanks,

Nathan Mahon

Notice of collection of personal information:

Personal information on this form is collected for the purpose of processing this application. The personal information is collected under the authority of the *Local Government Act* and the bylaws of the PRRD. Documentation/Information submitted in support of this application can be made available for public inspection pursuant to the *Freedom of Information and Protection of Privacy Act*.

4. Civic Address or location of property: 7397 Cove Lane, Moberly Lake, V0C 1X0

5. PARTICULARS OF PROPOSED AMENDMENT

Please check the box(es) that apply to your proposal:

☐ Official Community Plan (OCP) Bylaw amendment:

Existing OCP designation: _____

Proposed OCP designation: _____

Text amendment: _____

☐ Zoning Bylaw amendment:

Existing zone: R4

Proposed zone: R3

Text amendment: Required to allow Proposed lot 2 to be exempt from the minimum Parcel size.

☐ Development Variance Permit – describe proposed variance request:

☐ Temporary Use Permit – describe proposed use:

☐ Development Permit: Bylaw No. _____ Section No. _____

6. Describe the existing use and buildings on the subject property:

On proposed lot 1 there is a 3 sided hay an equipment shed, as well as two horse shelters and two dugouts.
On proposed lot 2 there is a residence, well, septic tank and mound, dispersion field and a small garden shed

7. Describe the existing land use and buildings on all lots adjacent to and surrounding the subject property:

(a) North Currently land is treed

(b) East Mostly treed land with a residential dwelling

(c) South Moberly Lake

(d) West Residential dwellings and Indian Reserve and mostly treed land

8. Describe the proposed development of the subject property. Attach a separate sheet if necessary:

We are proposing to subdivide the subject lot along Cove Lane. This would create 1 parcel north of the road and 1 parcel south of the road. Proposed lot 2 (south of road) would be about 0.05 hectares less than the minimum parcel size for an R3 lot, which is why we require a text amendment as well as rezoning.

9. Reasons and comments in support of the application. Attach a separate sheet if necessary:

This this subdivision logically splits the property along the road that currently separates it into 2 pieces.
The south side already has sewer and water systems in place. The lot on the north side of the road will be large enough to handle any sewer and water systems that would be required.

10. Describe the means of sewage disposal for the development:

Currently there is no need for sewage disposal on proposed lot 1. The applicant plans to sell this lot, so the method of sewage disposal would be up to the purchaser. Proposed lot 1 is a sufficient size to allow for disposal by lagoon or some other system. Proposed lot 2 will continue to use the septic mound and dispersion field.

11. Describe the means of water supply for the development:

Water supply on proposed lot 1 is currently for stock only. Water for the stock is supplied by two dugouts situated on proposed lot 1. It would be up to the purchaser of the land to decide if they needed water supply for a residence. Proposed lot 2 will continue to use the well for water supply.

THE FOLLOWING INFORMATION IS REQUIRED. FAILURE TO PROVIDE MAY DELAY YOUR APPLICATION.

12. Proof of ownership of the subject property or properties. (For example: Certificate of State of Title, BC Land Title Office Property Title Search or recent Property Tax Notice.)
13. A Sketch Plan of the subject property or properties, showing:
 - (a) the legal boundaries and dimensions of the subject property;
 - (b) boundaries, dimensions and area of any proposed lots (if subdivision is being proposed);
 - (c) the location of existing buildings and structures on the subject property, with distances to property lines;
 - (d) the location of any proposed buildings, structures, or additions thereto, with distances to property lines;
 - (e) the location of any existing sewage disposal systems;
 - (f) the location of any existing or proposed water source.

ADDITIONAL OR MORE DETAILED INFORMATION MAY BE REQUESTED BY THE PEACE RIVER REGIONAL DISTRICT FOLLOWING REVIEW OF YOUR APPLICATION.

If it is necessary for the property boundaries and the location of buildings and structures to be more accurately defined, a plan prepared by a British Columbia Land Surveyor may be required.

15. I / We the undersigned hereby declare that the information provided in this application is complete and is, to the best of my / our knowledge, a true statement of the facts related to this application.

DENISE GARDINER PRD LOT 553

SEPTIC SYSTEM

Distances: Well to house - 45 ft
Septic tank to mound - 86 ft
Septic tank to Lake - Between 110 & 140 ft depending on where the waterline is.
Diameter of mound - 18 ft
The house is 24 ft wide.

SEPTIC TANK - Installed August 2011.

1000 gallons, heavy duty, 2 compartment fibreglass tank certified for depths of 10 to 20 ft, Installed at a depth of 17 feet. A sump pump in one compartment pumps liquids out to a septic mound.

In 2011, ground flooding collapsed our then septic tank. We called Omar Kirkeeng who was a certified Septic System contractor. He came and looked at the problem and suggested different types of septic tanks and pump-out systems but said the mound and septic field were very good and shouldn't be touched. When we had the septic tank installed, Omar Kirkeeng was contacted by phone and gave the approval for the type of tank and pumping installation to the septic field.

SEPTIC MOUND - Installed early 1980's.

We purchased our house and property in 1974. Because the soil is hard-pan clay, the existing septic system did not work very well. We hired a contractor from Fort Saint John to install a septic mound. We were told this is what they use in the prairies and it works very well. We did not want an open dugout.

The contractor dug a hole in a large area. He installed river rocks over that area, then spread gravel over the rocks. He placed a culvert on the height of the property with long drainage tiles radiating from it. He placed more gravel, then dirt until it was a mound. There is a wooden lid on the top of the culvert. The mound itself is about 4 ft high on the South side and more than 8 ft high on the North side. Land slopes down from the mound to the road. At the bottom of the slope, there is a wide sand seam that continues under the road and disperses itself in the pasture. In the pasture, we had to dig irrigation ditches, dig a new dugout and widen and deepen the existing West dugout because of flooding during Spring runoff. There is no sand around the dugout and it has been used as a watering hole by horses, deer, moose, dogs and ducks. There was a swamp on the next property which is the WestMo First Nations land. They built a lodge nearby and dug irrigation ditches also. The lodge is connected to their water and septic system.

WELL - Installed Spring 2007.

As you can see on the diagram, the well is on the opposite side of the property from the septic field. It was drilled by Doug Lernal from Prince George. We had the water tested in that year. It is clean, good water but has to be treated for a high iron content.

Copy of the well specifications is included.

Ministry of
Transportation
and Infrastructure

Peace River Regional District
PO Box 810
1981 Alaska Avenue
Dawson Creek, BC V1G 4H8

Attn: Kole Casey

The Ministry of Transportation and Infrastructure (Ministry) has received and reviewed your referral of March 20, 2018 to “Rezone a 0.84 ha (2.08 acre) portion of District Lot 553, PRD except Plan 17999 and 21352, from R-4 ‘Residential 4 Zone’ to R-2 ‘Residential 2 Zone’ and to add the following text amendment to Part VI, General Regulations Section 35 R-2 (Residential 2 Zone) (a) Minimum Parcel Size: Exceptions to the minimum parcel size as follows: (ii) a 0.84 ha portion of District Lot 553, PRD except Plan 17999 and 21352, for which the minimum parcel size shall not be less than 0.84 ha (2.08 acres) where there is no community sewage system and has a sewage system approved by the agency having jurisdiction regarding sewage disposal.”

The property falls within Section 52 of the Transportation Act and will require Ministry of Transportation and Infrastructure formal bylaw approval.

The Ministry has no objections to the proposal as submitted and has no further comments at this time.

Thank you for the opportunity to comment. If you or the proponent has any questions, please contact Kristy Prothman at (250) 787-3336.

Sincerely,

Kristy Prothman
District Development Technician

 Peace River Regional District

**RE: Zoning Bylaw Amendment for PID: 014-707-586 District Lot 553, PRD,
 Except Plan 17999 & 21352**

This letter is in regards to the Bylaw Amendment Application located at the above noted location in Moberly Lake. The intent of the application is to rezone a 0.84 ha (2.08 acre) portion of District Lot 553, PRD except Plan 17999 and 21352, from R-4 "Residential 4 Zone" to R-2 "Residential 2 Zone", and by adding the following text amendment to Part VI, General Regulations Section 35 R-2 (Residential 2 Zone) (a) Minimum Parcel Size: Exceptions to the minimum parcel size as follows:

(ii) a 0.84 ha. portion of District Lot 553, PRD except Plan 17999 and 21352, for which the minimum parcel size shall not be less than 0.84 ha (2.08 acres) where there is no COMMUNITY SEWAGE SYSTEM and has a sewage system approved by the agency having jurisdiction regarding sewage disposal.

Subsequently, a proposed subdivision would logically split the property along the existing road that runs through it, creating 1 parcel north of the road and 1 parcel south of the road.

Based on the intended use of the Bylaw Amendment Application, **Approval is recommended** subject to the conditions below:

- As per the Public Health Act [SBC 2008] Ch. 28, the property owner must not create a health hazard.
- As per the Public Health Act [SBC 2008] Ch. 28, if the operator is required by regulation to have a licence or permit to engage in a regulated activity, the operator must obtain such licence or permit by submitting the appropriate application to the health officer prior to construction or operation of the regulated activity.
- As per the Public Health Act [SBC 2008] Ch. 28, an operator who engages in a regulated activity must comply with any requirement or duty set out in a regulation respecting the regulated activity.
- As per the Drinking Water Protection Act [SBC 2001] Ch. 9, the owner must not cause or allow contamination of a drinking water source, a well recharge zone, or an area adjacent to a drinking water source.

Please note that Northern Health's recommendation for approval of the zoning bylaw amendment does not guarantee approval at the time of subdivision. Northern Health assesses all subdivision applications referred in writing by an Approving Officer with the Ministry of Transportation and Infrastructure on the basis of current provincial health legislation and Northern Health policies and guidelines. Northern Health assesses each

June 28, 2018

application based on the suitability of proposed lots, which are not serviced by a community sewage disposal system, for service by an on-site sewage disposal system. In order to determine suitability, Northern Health would look at each proposed lot and would require the following site information: Percolation test results, soil evaluation (observation holes), and lot plans.

Northern Health recommends that the owner of the parcel become familiar with Northern Health's Guidelines for Subdivision **prior** to submitting an application for subdivision. At minimum, in order for the proposed subdivision to be considered for recommendation, Northern Health would require the following at the time of subdivision:

Proposed Lot 1 (2.67 ha/6.60 acres):

- This lot will be assessed for its capability to support an on-site sewage disposal system with **Type 1** treatment, such as a septic tank and underground absorption field, or a lagoon. The applicant must provide the site information as specified in the Northern Health Guidelines for Subdivision. This information will be verified during an on-site inspection by Northern Health.
- The applicant may need to demonstrate that the proposed lot has a reserve discharge area, which can meet the criteria specified in the Guidelines for Subdivision.

Proposed Lot 2 (0.84 ha/2.08 acres):

- This lot contains an existing dwelling connected to an existing on-site sewage disposal system. The applicant must provide documentation that shows that the existing sewage disposal system was constructed in accordance with provincial health legislation (e.g. a permit issued by an Environmental Health Officer or a "Letter of Certification").
- Northern Health may require an inspection of the existing sewage disposal system and a written assessment to be completed by a qualified authorized person.
- Northern Health will conduct an on-site inspection to evaluate the existing sewerage system to ensure there are no signs that the system is failing or causing a health hazard.
- The applicant will need to demonstrate that the proposed lot has a reserve discharge area, which can meet the criteria specified the Guidelines for Subdivision.

If you have any additional questions regarding this matter please contact me at 250-719-6500.

Sincerely,

Ali Moore CPHI(c)
Environmental Health Officer
Northern Health
