LAND USE POLICIES AND REGULATIONS

OFFICIAL COMMUNITY PLAN (OCP):	Agriculture – Rural Resource, Bylaw No. 1086, 1997
ZONING:	A-2 (Large Agricultural Holdings), Bylaw No. 506, 1986
AGRICULTURAL LAND RESERVE (ALR):	Excluded conditional to rezoning and re-designating
BUILDING INSPECTION AREA:	Within

SITE CONTEXT

The subject property is located ~ 60 km west of the district of Chetwynd on Highway 97 and is adjacent to the undeveloped Western Coal Load out Facility. The subject properties are accessed from Highway 97S to the north and un-named logging and mining roads to the south while the CN Rail line runs diagonally through the properties. This is a non-farming area of predominantly large scale District Lots with some smaller parcels nearby. It should be noted that the parcels also run adjacent to the Pine River and in order to access any of the Blocks from the highway, one needs to cross the Pine.

SITE FEATURES

LAND:	Although a site inspection has not been conducted, it appears through the use of aerial photographs that small portions of the subject properties near the rail line have been cleared in the past but the majority of the properties remain untouched.
STRUCTURES:	There currently is an unused 100 man camp on a portion of DL 384 as indicated on the attached map entitled Schedule A Temporary Industrial Use Permit # 123/2008 on page 12 of this report, but there are no buildings on any of the other lots.
ACCESS:	According to the application, access will be gained by way of an un-named forestry road to the southwest of DL 383
CLI SOIL RATING:	Predominantly Class 7TP - Soils in this class have no capacity for arable culture or permanent pasture, there is a small portion of Class 5PT. Class 5 soils have very severe limitations that restrict their capability in producing perennial forage crops, and improvement practices are feasible. Subclass T indicates soils having topographical constraints, while sub-class P indicates stoniness. There is also a small portion of Class 7T.
FIRE:	Outside all rural fire protection areas.

COMMENTS AND OBSERVATIONS

- APPLICANT:** It is the intent of the landowner to develop a “Coal Load-out Facility” which will operate in conjunction with a mine operated by First Coal south of the proposed load-out site.
- ALR:** The subject properties have been granted conditional exclusion from the Land Reserve By way of Resolution # 1626/2009 dated December 8, 2009. This rezoning and re-designation are conditions which are required to be satisfied in order to complete the exclusion process.
- OCP:** Pursuant to the West Peace Community Plan Bylaw No. 1086, 1997, the subject properties are designated “Agriculture – Rural Resource”. This designation does not permit the proposed type of development **Therefore this proposal requires an OCP amendment.**
- ZONING:** The subject properties are zoned A-2 (Large Agricultural Holdings) pursuant to Chetwynd Rural Area Zoning Bylaw No. 506, 1986 the proposed uses are not permitted in this zone. **Therefore this proposal requires a re-zoning.**
- PUBLIC CONSULTATION:** The re-zoning and re-designating process requires that the Regional District issue a public notification on the proposed changes to the zoning bylaw and Official Community Plan. This is accomplished by advertising the Public Hearing that can be held at a time and place of the Board’s choosing. The advertisements must reach at least every landowner within 100 meters of the subject property and be published twice in a local newspaper. However, the limits to the notification parameters may be altered if more people or areas are deemed affected by the proposal.

--	--

IMPACT ANALYSIS

- AGRICULTURE:** The impacts to agriculture will be minimal as the soil quality on the subject properties is very poor, soil ratings of 6 or 7 indicate that at best these properties could be utilized for grazing

purposes.

- CONTEXT:** There is a General industrial development in close proximity that was to be used as a “coal load-out facility” intended for use by Western Coal which has never been developed, because Western Coal bought Pine Valley Coal and is utilizing the load-out facility obtained in the purchase, however the zoning and OCP designation are in place. There will be little impact to any people as there are no inhabited lots within a 5km radius of the subject properties.
- ENVIRONMENTAL:** It should be noted that the Development Services Department has been in contact with Gerry Hamblin at the Environmental Assessment Office and through these talks we have learned that the “Load-Out Facility” itself would not require an Environmental Assessment, however First Coal has announced that it has applied for the entire project, the mine, road construction and load-out facility will all undergo the Environmental Assessment procedure. This will allow greater production flexibility in that First Coal has indicated it would be producing 245,000 tons per year but the Environmental Assessment of the project will enable First Coal to produce greater than 250,000 tons per year if demand requires the increased production.
- TRAFFIC:** As the subject properties are located along the Provincial Highway # 97 and the proposed development includes the construction of a “coal load-out facility” there will certainly be an increase in vehicular activity in the area however in the overall picture it will have very little impact on the area as transporting the coal from the mine to the load-out will all take place on off-highway roads. It is the intention of First Coal to build the 16km long “North Access” road to connect existing forestry roads as shown in the attached Central South Project Site Layout.
