

**PEACE RIVER REGIONAL DISTRICT
Solid Waste Committee**

for the meeting to be held on **Thursday, October 6, 2016**
at the Regional District offices, 1981 Alaska Avenue, Dawson Creek, BC
commencing at 9:00 am

1. **Call to Order:** **Chair – Director Dan Rose**
 2. **Notice of New Business:**
 3. **Adoption of the Agenda:**
 4. **Adoption of the Minutes:**
 - M-1 Solid Waste Committee Meeting Minutes of September 1, 2016
 5. **Business Arising from the Minutes:**
 6. **Reports**
 - R-1 September 7, 2016 – Loryn Day, Solid Waste Coordinator – Transfer Station Open House Costs
 - R-2 September 9, 2016 – Loryn Day, Solid Waste Coordinator – Waste Composition Study – issuance of a Request for Proposal
 - R-3 September 26, 2016 – Paulo Eichelberger – GM Environmental Services - Waste Education and Outreach Program
 7. **New Business:**
 8. **Items for Information:**
 9. **Diary - Regional Solid Waste Management Plan - Matrix and Terms of Reference**
 10. **Adjournment:**
-

PEACE RIVER REGIONAL DISTRICT Solid Waste Committee Meeting Minutes

DATE: Thursday, September 1, 2016

PLACE: Regional District Offices, Dawson Creek, BC

PRESENT: Director Dan Rose, Electoral Area 'E' – Meeting Chair
Alternate Director Brad Sperling, Electoral Area 'C'
Director Dale Bumstead, City of Dawson Creek
Director Lori Ackerman, City of Fort St. John
Alternate Director Melvin Deck, District of Chetwynd

Staff

Chris Cvik, Chief Administrative Officer
Paulo Eichelberger, General Manager of Environmental Services
Loryn Day, Solid Waste Coordinator
Suzanne Garrett, Corporate Services Coordinator

1) Call to Order The meeting was called to order at 9:10 am

ADOPTION OF THE AGENDA:

2) Adoption of the Agenda MOVED by Director Bumstead, SECONDED by Alternate Director Sperling, that the Solid Waste Committee agenda for the September 1, 2016 meeting including Director's new business and additional items for the agenda, be adopted as amended:

Call to Order
Notice of New Business
Adoption of the Agenda
Adoption of the Minutes
M-1 Solid Waste Committee Meeting Minutes of August 4, 2016
M-2 Public Information Open House Meeting Notes of August 17, 2016
Business Arising from the Minutes
BA-1 Regional Solid Waste Management Plan – Matrix and Map
Reports:
R-1 August 22, 2016 – Loryn Day, SW Coordinator – Transfer Station Open Houses
R-2 August 23, 2016 – Loryn Day, SW Coordinator – Solid Waste Customer Satisfaction Survey results
R-3 August 24, 2016 – Loryn Day, SW Coordinator – Northern Environmental Action Team – illegal dumping
R-4 August 17, 2016 – Paulo Eichelberger, GM Environmental Services – Waste Reduction Promotion and Education – Contract Award
New Business
Items for Information
Diary and Terms of Reference
Adjournment

CARRIED.

MINUTES:

3) M-1 MOVED by Alt Director Sperling, SECONDED by Alt Director Deck, that the Solid Waste Committee meeting minutes of August 4, 2016 be adopted.

CARRIED.

- 4) M-2 MOVED by Alt Director Deck, SECONDED by Alt Director Sperling,
That the Public Information Open House Meeting Notes of August 17, 2016 be
received.

CARRIED.

BUSINESS ARISING FROM THE MINUTES:

- 5) BA-1 Regional Solid Waste Management Plan – solid waste facility map:
- highlight the closed out facilities on the map. It is felt that the reduction in solid waste sites may be a contributing factor to the increased illegal dumping being experienced in the region.
- Regional Solid Waste Management Plan - matrix:
- Some survey result data has been included
 - Committee members were requested to forward any comments they would like to see included in the matrix
 - matrix will be forwarded to the Public Monitoring and Advisory Committee for their input
 - Identify other data that could be included

REPORTS:

- 6) R-1
re: Transfer
Stn Open
House Outcomes from the Transfer Station Open Houses, held between July 9 and August 20, 2016:
- excellent resource communicating with residents via facebook, posters in communities and schools
 - schedule events in the spring and fall, summer months are very busy with many other events taking place
 - Pink Mountain, bins are provided to residents by Progress Energy
 - suggest scheduling Open House event every other year, on the off years schedule roundups of specific materials, i.e. electronics and household hazardous waste

MOVED by Director Bumstead, SECONDED by Director Ackerman,
That the Solid Waste Committee recommends to the Regional Board that staff be directed to prepare a report outlining budget implications with respect to staff time and resources spent on the Transfer Station Open Houses.

CARRIED.

- 7) R-2
SW survey Solid Waste Customer Satisfaction Survey – survey was issued to residents from mid-April to August 20, 2016, with 947 residents responding. Key findings indicate:
- that residents are generally satisfied with the hours of operation but would like to see landfills open 7 days a week, with extended hours in the morning and evening; and extended hours at the transfer stations.
 - request for more education and outreach to provide information on share sheds and recycling (how easy and efficient it can be)
 - the majority of residents recycle
 - recycling habits, for the majority of residents, are not influenced by tipping fees
 - incentive based tipping fees work contribute to the majority of residents separating their waste materials prior to visiting a solid waste site

- 7) R-2 (continued)
- the majority of residents would like to see the solid waste function continue to be funded using the 50/50 split (tipping fees and property taxes)
 - residents would like to see share sheds at the landfills
 - Could not extract rural from municipal users as some residents indicated that both transfer stations and landfills were utilized. Next survey – define users.
 - It was suggested that a survey link be provided to residents (access issues)
 - Explore technology, make it easier for public to communicate with us
 - It was noted that there is an “app” under the garbage/recycling page that could be expanded to build in a feedback component

MOVED by Alt Director Sperling, SECONDED by Alt Director Deck,

- a) That the Solid Waste Committee recommends to the Regional Board that staff be directed to expand the existing “app” on the Environmental Services “garbage and recycling” page of the website to provide residents an opportunity to forward comments or questions, on a continual basis, with respect to solid waste; and
- b) That an in-depth customer satisfaction survey be conducted every five years.

CARRIED.

- Extended hours, it was suggested that this be looked at “seasonally”, i.e. summer hours. Will need to determine cost implications of seasonal hours over a 4 – 6 month period, number of users, perhaps offset winter hours to reduce budget, flexibility of current contract, days of week, and monitor any changes to illegal dumping issue
- To provide better access have bulky waste bins available at the Tier 2 transfer stations for 2 week period
- Will need to consider lost tipping fees, recycling is typically segregated unless drop off is done at a manned site where residents are directed what can be placed in garbage and recycling bins
- focus on assessing the effect of extending hours at high traffic sites, landfills at Besborough, Chetwynd, North Peace and DC transfer station until the solid waste matrix is finalized before addressing residents suggestion to extend operating hours at transfer station sites.

MOVED by Alt Director Sperling, SECONDED by Alt Director Deck,

That the Solid Waste Committee recommends to the Regional Board, that as a result of the Solid Waste Customer Satisfaction Survey, staff be directed to prepare a report outlining options with respect to implementing “seasonal” hours of operation at the Chetwynd, Bessborough and North Peace Regional landfills and the Dawson Creek Transfer Station, taking into account:

- o Cost implications to implement seasonal hours over a 4 to 6 month period and cost implications to offset winter hours;
- o Identify, if any, other options/opportunities that could be implemented;
- o Determine/track number of users;
- o Flexibility of current contract;
- o Identify which days would be extended; and
- o Monitor what effect, if any, extending hours of operation will have on illegal dumping.

CARRIED.

- 8) R-3
re: illegal dumping
- MOVED by Director Ackerman, SECONDED by Alt Director Deck,
- a) That the Solid Waste Committee recommends to the Regional Board that the Board acknowledges and affirms that it is the Province who is ultimately the regulator responsible for enforcement, education and clean-up of illegally dumped items; and
 - b) that the Regional District use its communication methods to promote the Ministry of Environment's RAPP (Report all Poachers and Polluters) telephone number and website.

CARRIED.

It was suggested that staff have a conversation with the Northern Environmental Action Team to assist them in understanding the jurisdiction that they are working for, i.e. amending bylaws, processes local government operates under, etc.

- 9) R-4
- Discussion ensued regarding the education and outreach program services currently being provided:
- critical activities need to be identified,
 - what is the value, what does contractor provide for that amount of money
 - let them know what our specific needs are for education and outreach
 - hire staff, taking in account costs associated, do not have resources now
 - feel there is a gap, what activities are of value?
 - consider going another direction, to be more cost effective
 - how do we deliver function and activities for value, or do we continue?
 - contract, need to give them adequate notice
 - what will it cost for the Regional District to fill in the gap, is it possible to have staff person with admin support (summer - utilize university students to promote activities at schools)

- MOVED by Director Ackerman, SECONDED by Director Bumstead,
- a) That the Solid Waste Committee recommends to the Regional Board that the Waste Reduction Promotion and Education contract be extended to December 31, 2016, at its current rate; and
 - b) That staff be directed to prepare a report outlining different scenarios, in-house versus contracting out, for the provision of the education and outreach program component of the Regional Solid Waste Management Plan (Section 5.5.1 Continue Existing Waste Reduction Education Programs).

CARRIED.

NEW BUSINESS:

- 10) NB-1 tires
- Discussion ensued regarding tires, how did the landfills start accepting tires and why do people have to pay twice (eco fee at purchase time and again when disposing at landfills)?
- Staff explained that stewardship agency "Tire Stewardship BC" (TSBC) does not provide monies from the eco fees to the Regional District for accepting program tires at the landfill site. TSBC program is volunteer only, pays for signage and conducts roundups annually at tire dealerships. Various regional districts are lobbying for stewardship programs such as TSBC to help offset costs for managing what is essentially their product. Customers at landfills and transfer stations are encouraged to drop off their tires (off-rim) at tire dealerships as that is free.

11) Meeting schedule 9:00 am, October 6,
 10:00 am, November 3,
 10:00 am, December 1

12) Committee Report MOVED by Director Bumstead, SECONDED by Alt Director Deck,
 That the recommendations from the Solid Waste Committee meeting of
 September 1, 2016 be recommended to the Regional Board for approval.

CARRIED.

13) Adjournment The meeting adjourned at 11:15 am

Director Dan Rose,
Chair – Solid Waste Committee

S. Garrett,
Corporate Services Coordinator

October 6, 2016

REPORT

To: Solid Waste Committee

Date: September 7, 2016

From: Loryn Day, Solid Waste Coordinator

Subject: Transfer Station Open House Costs

RECOMMENDATION(S):

To be received as information.

BACKGROUND/RATIONALE:

This report is the follow up to the "Transfer Station Open Houses" report, provided at the September 2nd, 2016 Solid Waste Committee Meeting and based the following Board resolution:

RD/16/09/15 (22):

That staff be directed to prepare a report outlining budget implications with respect to staff time and resources spent on the Transfer Station Open Houses.

The following outlines the costs to run these events, broken down by advertising, door prizes, and staffing.

Advertising Costs:

A multifaceted approach for advertising was used, with the aim of being cost-effective as possible. All advertising costs were already accounted for in the Solid Waste and Communication budgets. Advertising for these events did not cause any increase to the budgets.

Advertising Option	Budget	Costs
Design Costs for the Poster	Communication's Budget – Already accounted into budget	\$378.00
Printing of Poster to be handed out at Rural School	Solid Waste: Advertising – Already accounted into budget	\$497.55
"pRRRdy says" Radio Ads	NEAT provided those ads under their current contract	No Extra Costs
¼ page advertisement in the Dawson Creek Mirror	Solid Waste: Advertising – Already accounted into budget	\$400.00
¼ page advertisement in the Alaska Highway News	Solid Waste: Advertising – Already accounted into budget	\$600.00
Table Topper	Solid Waste: Advertising – Already accounted into budget	\$90.00
Posters to Transfer Stations	In house printing	No Extra Costs
Facebook and Website Posts	Solid Waste Staff	No Extra Costs
Electronic versions of the posters sent to community contacts for distribution	Solid Waste Staff	No Extra Costs
<i>Sub-total Communications</i>		<i>\$378.00</i>
<i>Sub-total Solid Waste</i>		<i>\$1587.55</i>
Total		\$1965.55

Door Prizes:

Door prizes were sourced locally and included:

- Game sets for children
- Kitchen composter, kitchen utensils, insulated picnic/carry bags, and reusable food containers for adults

The total cost of the prizes were \$1052.95 including taxes. Prizes for these events did were covered off within the Solid Waste Budget.

Staffing:

The transfer station events occurred on six Saturdays over the summer which were outside of regular work hours. Below is a chart of staff time for each event.

<i>Site</i>	<i>Event Time</i>	<i>Dates</i>	<i>Start/ End Time</i>	<i>Estimated Travel Time</i>	<i>Total Hours</i>
Kelly Lake	10am - 12pm	09-Jul	8:30am	1	9.5
Tomslake	3pm - 5pm		6:00pm	0.5	
Rolla	10am - 12pm	16-Jul	9:00am	0.5	10
Moberly	3pm - 5pm		7:00pm	1.5	
Pink Mountain	10am - 12pm	23-Jul	7:00am	2.5	12.5
Upper Halfway	3pm - 5pm		7:30pm	2	
Wonowon	10am - 12pm	06-Aug	7:30am	2	12
Buick Creek	3pm - 5pm		7:30pm	2	
Prespatou	10am - 12pm	13-Aug	7:30am	2	11.5
Rose Prairie	3pm - 5pm		7:00pm	1.5	
Cecil Lake	10am - 12pm	20-Aug	8:00am	1.5	10.5
Goodlow	3pm - 5pm		6:30pm	1	

To reduce costs to compensate for extra staff time, tools such as shift trades and banking overtime were used.

Pursuant to section 17.01 Hours of Work in the Collective Agreement¹, shift changes were scheduled for employees working the transfer station open houses for the first seven (7) hours. The altering of a shift can only be for the shift period, which is seven hours.

¹ 17.01 Hours of Work: the Employer may alter the hours of work of any employee forty-eight (48) hours' notice to the employee

Pursuant to section 18.01 Overtime Defined in the Collective Agreement², overtime was collected for the remaining hours. The shift change excluded the first seven hours of the shift to be classified as overtime, thus reducing costs. For the overtime generated as a result of these events, staff banked the hours, pursuant to section 18.08 Time off in Lieu of Overtime of the Collective Agreement³, rather than being paid out, to further reduce additional costs. If staff were paid out for the overtime, it would have cost \$1,607.87, but this was not paid out, rather the time was banked.

In conclusion, actual costs were covered off without adversely impacting to the Solid Waste and Communications budgets.

OPTIONS:

To be received for information.

STRATEGIC PLAN RELEVANCE:

Solid Waste Management Plan – Waste Reduction Education and Outreach

FINANCIAL CONSIDERATION(S):

The Transfer Station Open Houses were covered off in the Solid Waste and Communications Budgets.

COMMUNICATIONS CONSIDERATION(S):

N/A

OTHER CONSIDERATION(S):

N/A

Attachments:

² 18.01 Overtime Defined: All time worked in excess of the daily hours or on a paid holiday or day of rest shall be considered overtime

³ 18.08 Time off in Lieu of Overtime: Instead of cash payment for overtime, employees may choose to receive time off banked in equivalent hours at the overtime rate, to be taken at a mutually agreed time

Peace River Regional District

REPORT

To: Solid Waste Committee

Date: September 9, 2016

From: Loryn Day, Solid Waste Coordinator

Subject: Issuance of a Waste Composition Study – Request for Proposal

RECOMMENDATION(S):

Option A:

That the Solid Waste Committee recommends that the Regional Board direct staff to issue a Request for Proposal for a Waste Composition Study.

BACKGROUND/RATIONALE:

Staff are looking to issue a request for proposal for the services to conduct a waste composition study. A waste composition study is a formalized approach to learn more about the composition of waste arriving at the Regional District landfills. Waste is hand sorted, weighed, and classified to gather a deeper understanding of what is disposed of. Over the last decade, many communities, such as Metro Vancouver, the City of Prince George, and Cowichan Valley Regional District have conducted them.

Reasons for undertaking waste characterization studies include the following:

- Measure the progress set out a Regional District's Waste Management Plan;
- Obtain sector specific data (e.g. single family residential, multi-family residential, industrial, commercial & institutional);
- Establish a baseline for new program initiatives (e.g. diversion of green waste, reduce the quantity of beverage containers in the waste destined for disposal stream);
- Determine the level of conformance to local or provincial policies;
- Measure the success of one or more stewardship programs within the regional district or municipality.

Conducting a waste composition study is an objective in Phase 1 of the Regional Districts' Solid Waste Management Plan. This study aims to:

- Establish a baseline understanding of our solid waste stream composition
- Identify major avenues for waste diversion and reduction
- Set a benchmark for comparison with future audits for the Regional District
- Provide insight into the portion of the overall community waste stream not deposited at landfills

The British Columbia Ministry of Environment's Waste Characterization Tool will be used in conducting the waste composition study, as it creates a standardization amongst such studies completed in the Province by other regional districts.

The waste composition will be conducted over the span of a year, with representative sampling and analysis happening in each season.

The primary objectives of the waste composition study will be to:

- determine the composition of solid waste being disposed of at the three landfills by material type
- determine the composition of the solid waste stream attributable to each of the residential, industrial/commercial/institutional (ICI), and demolition, land-clearing, and construction (DLC) sectors
- specify the composition of the solid waste stream, by material type, being produced by each of the three aforementioned sectors

Waste composition studies are performed by third party consultants, who specialize in waste audits, as they have the expertise, resources, and knowledge of performing this work. The aim is to issue the Request for Proposal this year for work to be completed in 2017.

OPTIONS:

Option A:

That the Solid Waste Committee recommends that Staff issue a Request for Proposal for a Waste Composition Study

Option B:

That the Solid Waste Committee direct staff with alternative direction.

STRATEGIC PLAN RELEVANCE:

Solid Waste Management Plan

FINANCIAL CONSIDERATION(S):

The anticipated to conduct this work is approximately \$100,000. This work will be incorporated into the 2017 budget.

COMMUNICATIONS CONSIDERATION(S):

N/A

OTHER CONSIDERATION(S):

This will be a light capital project year for Solid Waste. There will be no large scale construction projects in 2017, other than additional manned transfer stations.

There may be an opportunity for Stewardship Agencies to contribute some monies to the audit.

Peace River Regional District

REPORT

To: Solid Waste Committee

Date: Sept. 26/2016

From: Paulo Eichelberger, General Manager of Environmental Services

Subject: PRRD Waste Education and Outreach Program

RECOMMENDATION(S):

That the Solid Waste Committee receive this report for information and provide feedback to staff.

BACKGROUND/RATIONALE:

On September 22nd, the Regional Board made the following resolution with respect to the current Waste Reduction Promotion and Education Contract:

RD/16/09/19 (22) MOVED Director Rose, SECONDED Alternate Director Boon,

b) That staff be directed to prepare a report outlining different scenarios, in-house versus contracting out, for the provision of the education and outreach program component of the Regional Solid Waste Management Plan (Section 5.5.1 Continue Existing Waste Reduction Education Program). CARRIED.

To that end, staff has been reviewing the work done by the Northern Environmental Action Team (NEAT) on PRRD's behalf (attached) in order to provide guidance on programs/operations that may no longer be needed versus those that are still required to further our outreach. The goal of this exercise is two-fold:

- a) Narrow down needed programs/services required to further our education/outreach endeavors. This will affect future costs.
- b) Use the results of "a)" to compare the costs for these programs if they were either contracted out or brought in-house. This analysis will be brought forward to the next Solid Waste Committee meeting.

Review of Existing Waste Education & Outreach Programs

Our programs flow from the goals listed in Section 5.5.1 of the plan (attached). In keeping with these goals, the following tables illustrate which program activities need to be maintained, refined in scope or removed completely.

Table 1

Needed Program Activity	Comments
Green Line	Single point of contact for questions around waste reduction – well used by public
Maintenance of www.prrrdy.com (& waste wizard app)	Online resources for waste, recycling, composting.
Radio, Newspaper & TV ads (social media – Facebook & Twitter)	Another resource for info, covers several of our education/communication goals.
Waste Reduction Calendar	Provides info on stewardship round-up events, helpful waste reduction tips.

Monthly & annual reporting (admin work)	Captures trends in environmental topics coming from the public, aids in providing snapshot of work-to-date
Special Waste Events	Provides opportunities for the public to drop off special materials
Fostering community partnerships	Ongoing – aids in capitalizing on outreach opportunities.
Construction/Demolition Waste Reduction	Goal within our Solid Waste Management Plan

Table 2

Programs/Activities which may be reduced/modified in scope	Comments
Design and distribution of brochures, tools and educational materials	Design work on brochures is being done by 3 rd party through PRRD Comm. department to keep brand consistent. Staff (and currently NEAT) providing content and input on layout.
School based programs encouraging waste reduction	Material is part of the newest school curriculum (2015), woven through grades K-12. Scope of work can be significantly reduced to only providing resource materials as needed by SD 59/60 and coordinate tours of landfills, transfer stations and recycling facilities.
Production of “pRRRdy says” Newsletter	Now online (pRRRdy website) and incorporated into PRRD news supplement during the year. Scope can be reduced to supplying content. Actual design handled in the same manner as the brochures (above)

Based on the information above, there is an opportunity to refine our education program. Depending on additional input from the Committee, staff identifies the following as next steps:

- a) Work with NEAT to update their costs to deliver our education programs with the above modifications AND
- b) Construct a cost estimate for performing the same programs in-house, with the above mentioned program modifications, including costs for required staff and resources.

Staff will be providing both of these scenarios for the November 3rd SWC meeting with recommendations for solid waste education & outreach in 2017.

OPTIONS:

That the Solid Waste Committee receive this report for information and provide feedback to staff.

STRATEGIC PLAN RELEVANCE: Solid Waste Management Plan (Section 5.5.1 Continue Existing Waste Reduction Education Program)

FINANCIAL CONSIDERATION(S): Recommendations from this report and the November SWC report will help inform the Solid Waste and Communications budgets for 2017.

COMMUNICATIONS CONSIDERATION(S): None at this time

OTHER CONSIDERATION(S): If all waste education/outreach is brought in house, it will result in additional staffing in the communications department (to be detailed in November 2016 Solid Waste Committee Report)

Attachments: Appendix A – Excerpt from Solid Waste Management Plan, Section 5.5.1, pg 24-25
Appendix B – Program data provided by NEAT 2015-16

ban. Private haulers or municipal haulers may consider preventing collection of the material in question at the source.

5.4.3 Implications of Phase 1 Policy Options

This strong foundation in the guiding principles means that these options are directly supportive of the overall intent of the Plan. These policy options will work best if implemented together, as they address various aspects of the same issue – how to reduce the amount of waste being disposed, by creating both incentives and drivers to divert more waste from the region's landfills. It is important to recognize that these policy options will also require co-operation between the PRRD and the member municipalities, as consistency of their implementation and enforcement is an important factor in their success.

In terms of the impacts of these policies on the waste management infrastructure in the region, it is likely that there will be some implications for the recycling service providers, as the intent would be to enforce these policies when alternative recycling options are in place. The regional district's transfer station and landfill network will also need to be upgraded so as to allow enforcement of these policies. Member municipalities would likely need to incorporate issues such as disposal limits and disposal bans at the point of collection to provide the needed continuity with the regional district's intentions.

5.5 Programs to Support Objective #4: Support & Expand Existing Programs

The program options in this section build on existing programs and services. Many of these programs focus on education and awareness building efforts, to increase waste reduction and reuse opportunities in particular.

5.5.1 Continue Existing Waste Reduction Education Program

The need for public engagement and outreach programming is considered to be a foundation activity in the Plan's success, particularly as it is recognized that many of the programs contemplated in the Plan rely on changes in the behaviours of the citizens of the region – whether at home, at work or both – in order to succeed.

Currently, recycling and waste reduction education programs are provided by the Northern Environmental Action Team (NEAT) on behalf of the Regional District, through a contract between the two organizations. The organization was formed as a not-for-profit community group, and has been in operation since 1989. The PRRD has contracted with NEAT since 1997 to provide its waste reduction education programming. NEAT is responsible for the development and implementation of waste reduction education promotion programs in the Regional District, the objectives of which are to reduce the volume of waste produced by residents and businesses, encourage the re-use of goods and materials by residents and

businesses, and to maximize participation in recycling, composting and other waste reduction initiatives.

Specific waste reduction education activities have and continue to include:

- Operation of the “Green Line”, a toll-free hotline number providing waste reduction & recycling information for the BC Peace Region
- Develop of waste reduction education programs for businesses
- Composting education
- Sale of residential backyard compost units
- Household hazardous waste handling and reduction education
- Materials exchange program support
- Special events e.g. yard waste drop-off in Fort St. John
- School-based programs to encourage greater awareness of waste reduction in schools, children and youth
- Design and distribution of brochures, tools and educational materials on a range of waste reduction topics
- Maintenance of the www.prrrdy.com website
- Production of the “Prrrdy Says” Newsletter
- Ongoing support for waste reduction education and awareness throughout the region
- Acting as Waste Information Centre for the PRRD regarding tipping fees, facility locations, operating hours and policies.

The Regional District will continue similar programs to those noted above, in order to support existing and proposed programs. As is already occurring, these programs will continue to embrace the principles of community-based social marketing. This approach focuses on influencing behaviours, as much research has shown that providing information alone is not always successful in encouraging individuals to change how they do things.

This approach would continue to be integrated into the public outreach and engagement campaign to support the implementation of the Plan. Where appropriate, these strategies will be supported by informational materials using brochures, web sites and information provided by other partners such as environmental organizations, recycling organizations, stewardship agencies and community groups.

5.5.2 Promote and Support Existing Reuse Opportunities

The PRRD recognizes the value of formalized and informal reuse opportunities that exist throughout the region. Rather than duplicate other programs that already exist in the

Litterless Lunches

I just wanted to take the time to thank you again for coming to our Kindergarten class at Duncan Cran Elementary to do a presentation on recycling. The students were engaged + I think learned quite a bit! I have noticed more effort on their part to sort their garbage + a better awareness of how ^{much} packaging in their lunches can be recycled.

I was very impressed with the quality of your presentation + your ability to manage the class given their short attention span + current ability. I am happy to know that FSJ has such a great organization that offers workshops of an environmental nature to the community. Take care,
Julie Wright

Thank you note from Julie Wright after a recycling presentation to her kindergarten class at Duncan Cran.

March 2015 Waste Reduction and Education Summary

Item:	Hours
Admin (see note below)	474.75
Outreach (see note below)	196.00
Education (see note below)	110.25
Communication	38.25
Total:	819.25

The Summer Garden Program consists of Whimsical Wednesdays and Fearless Fridays. Each week is themed with fairy tales or super heroes and contains a reuse craft, story time and opportunity for participants to play in the garden. Caregivers have been very receptive to the program and the participants love it!

Eco-Play Playgroup is a collaboration between pRRRdy and the CCRR. This preschool program is open to families and daycare providers. Each week, a theme guides a reused, nature-based craft and story time. Many questions have been asked by adults attending the program about recycling and organic services in the region, as well as, cloth diapering and green cleaning.

Students explore the storage area under the Salvation Army Thrift Store. This tour starts at a reuse location, proceeds to a recycling location (Bottle Drop or Eco Depot) and ends at the landfill. Throughout the tours, students are challenged to think of ways they can reduce waste through small changes in their daily lives.

R-3 BACKGROUNDER

Northern Environmental Action Team (NEAT)

Waste Reduction Education Program 1997- present

The PRRD has contracted with NEAT since 1997 to provide its waste reduction education programming. NEAT is responsible for the development and implementation of waste reduction education promotion programs in the Regional District, the objectives of which are to reduce the volume of waste produced by residents and businesses, encourage the re-use of goods and materials by residents and businesses, and to maximize participation in recycling, composting and other waste reduction initiatives.

Specific waste reduction education activities have included:

- Operation of the “Green Line”, a toll-free hotline number providing waste reduction & recycling information for the BC Peace Region
- Development of waste reduction education programs for businesses
- Composting education
- Sale of residential backyard compost units
- Household hazardous waste handling and reduction education
- Materials exchange program support
- Special events e.g. yard waste drop-off in Fort St. John
- School-based programs to encourage greater awareness of waste reduction in schools- children and youth
- Design and distribution of brochures, tools and educational materials on a range of waste reduction topics
- Maintenance of the www.prrrdy.com website
- Production of the “Prrrdy Says” Newsletter
- Ongoing support for waste reduction education and awareness throughout the region
- Acting as Waste Information Centre for the PRRD regarding tipping fees, facility locations, operating hours and policies.

Budget Allocations 1997- 2015

2015 Stats

In 2015 there were approximately 98,270 interactions with the community through a variety of waste reduction education events, initiatives and promotions.

Waste reduction education programming has contributed to the Waste Management Plan's goal of waste being diverted from the landfills. In 2015, 23.62 % of waste was diverted from the landfills. The percentage includes material diverted at the landfills and the recycling eco depot collections.

ACTIVITY		REACH
Preschool & School presentations	74 school visits	2,196 participants

Transtor	Tumbler Ridge	West Peace	103 Ridge Road	Tuesday to Saturday 10 a.m. to 6 p.m.	PRRD is only responsible for Garbage; District of Tumbler Ridge is responsible for other material collect	
Transtor	Hudson's Hope	West Peace	20318 Canyon Road	Wednesday to Sunday 11 a.m. to 7 p.m.	PRRD is only responsible for Garbage; District of Hudson's Hope is responsible for other material collect	

General Comments

- Why is there an extra charge for tires
- At the PL6 Sites (unmanned) residents are concerned that people from the towns are using them
- Residents in Dawson Creek would like to see curbside recycling
- Don't use attended or unattended as they are inconvenient in hours and the cost, so private disposal are contracted
- I do not produce enough garbage for coupons, would like to see them in smaller amounts
- DC Recycling Centre is very unappealing, dirty and smelly
- I don't recycle as it is not convenient (DC)
- Collection of curbside organics
- Extra fees and sorting discourages people
- New transfer stations are not convenient
- Punch card system would be great

Notes/Survey Comments

Comments

Survey Comments indicated that people wanted Sunday hours; extended hours in summer for evenings; would like to see a share shed;

Extended hours in the summer (evenings)

Survey Comments indicated that people wanted Sunday hours extended hours in summer for evenings; would like to see share shed; residents don't like going up the active face

Site is messy and abused

Site is messy and abused; large items are always dropped off here and residents are eagerly awaiting attended site

Originally going to be located at the old/closed Lone Prairie Landfill - Public Meeting held in 2015 with residents of Lone Prairie and Sukunka. One major issue brought up, location was not ideal for all residents. It was suggested that the location of the Transfer Station be about 1km off the turn off of Lone Prairie Road. Based on that information, staff is to locate land in that area based on resident comments

Originally going to be located at the old/closed Lone Prairie Landfill - Public Meeting held in 2015 with residents of Lone Prairie and Sukunka. One major issue brought up, location was not ideal for all residents. It was suggested that the location of the Transfer Station be about 1km off the turn off of Lone Prairie Road. Based on that information, staff is to locate land in that area based on resident comments

In favour of a manned site if it was to be situated in Progress not if their unmanned site was removed and they would have to travel to Groundbirch/Bessborough

Larger Share Shed

Would like to see glass recycling; would like to see an area for free tree waste and grass drop spot; would like to see a share shed; be open 7 days a week; would like to see the collection of oil and antifreeze

Please change hours to earlier and later

change hours to earlier and later; Progress Energy provides approximately 4 bins along roadsides just off the highway and has told residents in the area to use free of charge. Positive feed back from Open House but residents prefer to use Progress Energy's bins.

liked the old site; would like to see more recycling options

Would like to see the bulky bins spring/fall

Residents would like to see this stay

District of Tumbler Ridge runs the recycling and divertible materials (metal, batteries, tires, etc.). The PRRD is only responsible for the garbage and the Transtor. Pays for one employee there

The PRRD is only responsible for the garbage and Transtor. Pays/administers contract for the employee. District of Hudson's Hope is responsible for the other material.

General Comments

- Why is there an extra charge for tires
- At the PL6 Sites (unmanned) residents are concerned that people from the towns are using them
- Residents in Dawson Creek would like to see curbside recycling
- Don't use attended or unattended as they are inconvenient in hours and the cost, so private disposal are contracted
- I do not produce enough garbage for coupons, would like to see them in smaller amounts
- DC Recycling Centre is very unappealing, dirty and smelly
- I don't recycle as it is not convenient (DC)
- Collection of curbside organics
- Extra fees and sorting discourages people
- New transfer stations are not convenient
- Punch card system would be great

Notes/Survey Comments

Comments

Survey Comments indicated that people wanted Sunday hours; extended hours in summer for evenings; would like to see a share shed;

Extended hours in the summer (evenings)

Survey Comments indicated that people wanted Sunday hours extended hours in summer for evenings; would like to see share shed; residents don't like going up the active face

Site is messy and abused

Site is messy and abused; large items are always dropped off here and residents are eagerly awaiting attended site

Originally going to be located at the old/closed Lone Prairie Landfill - Public Meeting held in 2015 with residents of Lone Prairie and Sukunka. One major issue brought up, location was not ideal for all residents. It was suggested that the location of the Transfer Station be about 1km off the turn off of Lone Prairie Road. Based on that information, staff is to locate land in that area based on resident comments

One major issue brought up, location was not ideal for all residents. It was suggested that the location of the Transfer Station be about 1km off the turn off of Lone Prairie Road. Based on that information, staff is to locate land in that area based on resident comments

In favour of a manned site if it was to be situated in Progress not if their unmanned site was removed and they would have to travel to Groundbirch/Bessborough

Larger Share Shed

Would like to see glass recycling; would like to see an area for free tree waste and grass drop spot; would like to see a share shed; be open 7 days a week; would like to see the collection of oil and antifreeze

Please change hours to earlier and later

change hours to earlier and later; Progress Energy provides approximately 4 bins along roadsides just off the highway and has told residents in the area to use free of charge. Positive feed back from Open House but residents prefer to use Progress Energy's bins.

liked the old site; would like to see more recycling options

Would like to see the bulky bins spring/fall

Residents would like to see this stay

District of Tumbler Ridge runs the recycling and divertible materials (metal, batteries, tires, etc.). The PRRD is only responsible for the garbage and the Transtor. Pays for one employee there

The PRRD is only responsible for the garbage and Transtor. Pays/administers contract for the employee. District of Hudson's Hope is responsible for the other material.

Solid Waste Committee TERMS OF REFERENCE

The Peace River Regional District (PRRD) developed a Regional Solid Waste Management Plan that was approved in 2009. The Plan addresses three key areas:

- Greater efficiency of programs and services
- Greater focus on reducing, reusing and recycling to protect our environment
- Greater focus on sustainable management to protect future generations

ROLE OF THE COMMITTEE

With the understanding that Solid Waste Management is a regional function and represents our largest single budget item; the goals of the Solid Waste Committee (SWC) is to act as an advisory committee for the Regional District solid waste management function and identify concerns and issues that may arise.

STRUCTURE OF THE SOLID WASTE COMMITTEE

1. Members: The SWC will consist of five (5) Board members as appointed by the Chair and will consist of:

- Director from the City of Dawson Creek, or alternate director
- Director from the City of Fort St. John, or alternate director
- Director from the District of Chetwynd, or alternate director
- Director from Electoral Area 'B', or alternate (Electoral Area 'C' Director)
- Director from Electoral Area 'E', or alternate (Electoral Area 'D' Director)
- PRRD Board Chair, as ex-officio member
- The meetings will be chaired by a Committee member elected by the Committee participants on an annual basis
- In the absence of the Chair, a member elected Vice-Chair by the Committee on an annual basis will chair the meetings;
- Appropriate Regional District staff person – non-voting.

2. Meetings:

- The Committee shall meet on a monthly basis, on the first Thursday of every month;
- Meetings will be open to the public;
- Items for the regular agenda must be provided to Administration one (1) week prior to the scheduled meeting;
- The PRRD Board Chair will be given a copy of all Committee meeting agendas.

3. Procedures:

- Quorum – at least one-half of the members of the Committee;
- Voting – all options and recommendations shall be determined by majority vote, with recommendations and options being forwarded to the Regional Board for consideration and action.
